Introduction

The Online Bakery Shop major project is an application which is based on managing the Bakery Item and sell the Bakery Item online. The main purpose for developing this Online Bakery Shop Project in Java Spring Boot is to manage all the details about Bakery Item, Bakery Item Category, Company, Order etc. There are two Categories of users available in the project, first one is Admin and second one is Customer. Moreover, this system is designed for the particular need of the company to carry out operations in a smooth and effective manner. No formal knowledge is needed for the user to use this system. Thus, by this all it proves it is user-friendly.

Tools and Technologies

- HTML: Page layout has been designed in HTML
- CSS: CSS has been used for all the designing part
- JavaScript: All the validation task and animations has been developed by JavaScript
- Java Spring Boot: All the business and backend API logic has been implemented in Java Spring Boot
- H2: H2 database has been used as database for the project
- Thymeleaf: All the frontend logic has been implemented over the thymeleaf.
- STS: We have used STS (Spring Tool Suite) for developing all spring boot API's
- Tomcat: Project will be run over the Tomcat server

Modules

We have two modules in our project: -

1. Admin

Manage Bakery Item

- Adding New Bakery Item
- Edit the Existing Bakery Item
- View details of the Bakery Item
- Listing of all Bakery Item

Flow of the Project

1. Customer

Home page - This is the landing page for our customer

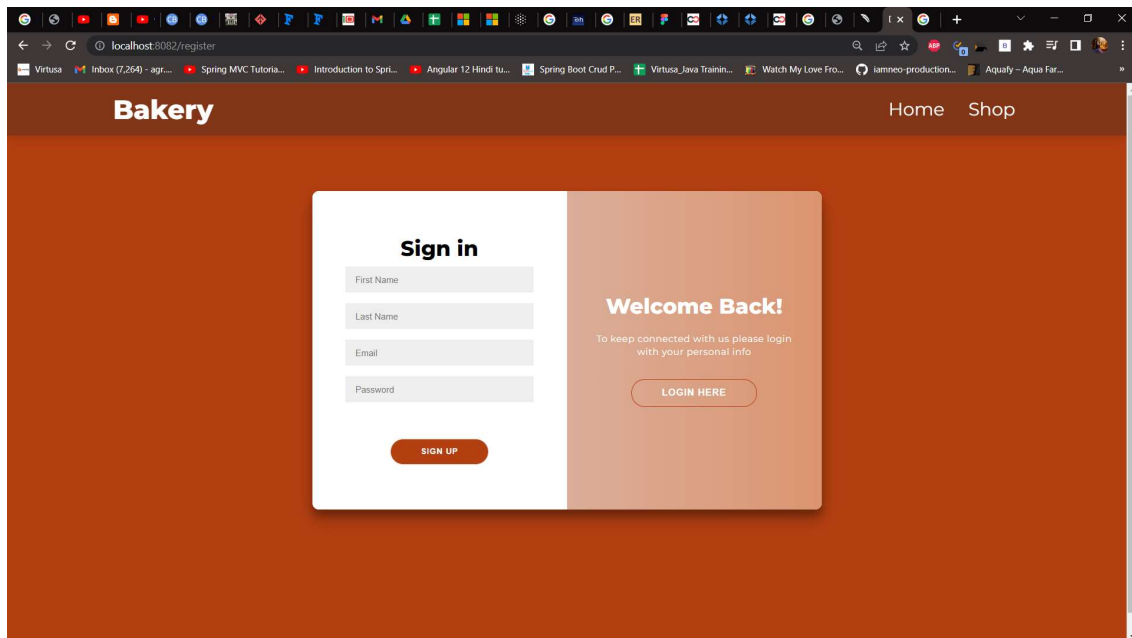

Login Page – Already registered customer can log in from the login button on home page

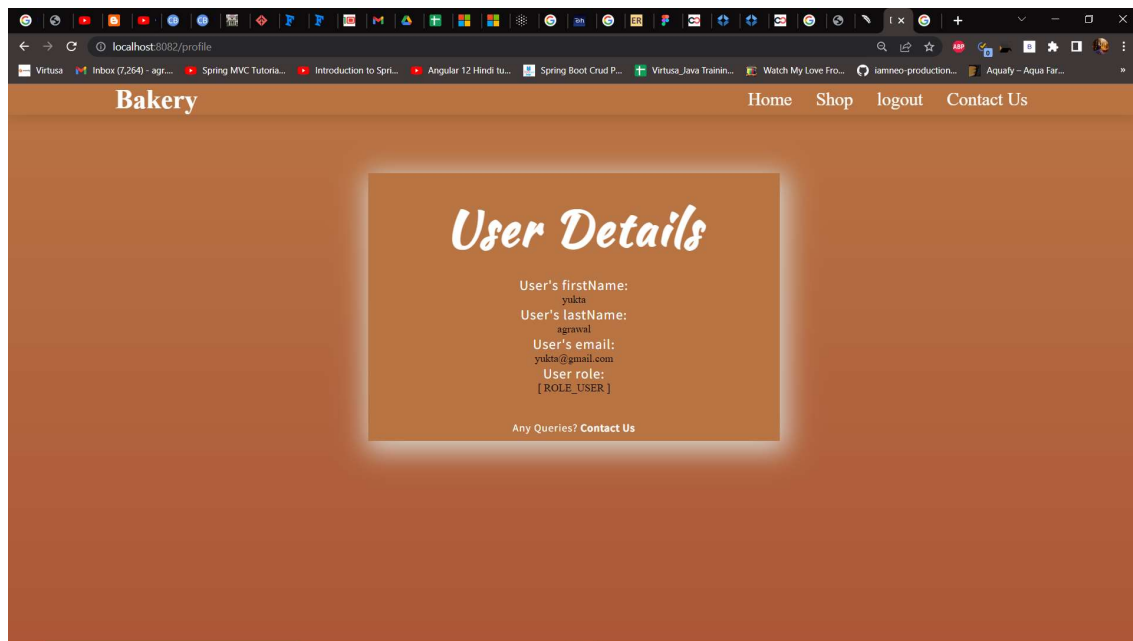

The screenshot shows a web browser at localhost:8082/login. The page has a dark orange header with the 'Bakery' logo and 'Home' and 'Shop' links. The main content area is a light orange rectangle. On the left, a white box titled 'Sign in' contains input fields for 'Email' and 'Password', and a 'SIGN IN' button. On the right, a light orange box titled 'Hello, Friend!' contains the text 'Enter your personal details and start journey with us' and a 'SIGN UP' button.

Registration Page – If you are a new customer, you can register by clicking the sign-up button on the login page.

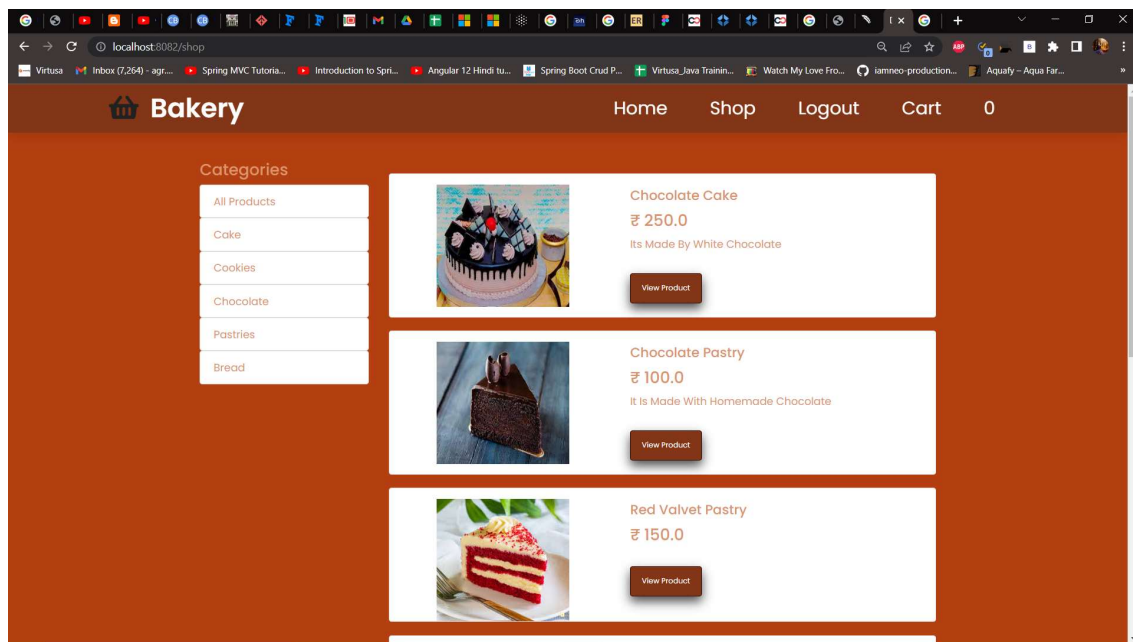

The screenshot shows a web browser at localhost:8082/register. The page has a dark orange header with the 'Bakery' logo and 'Home' and 'Shop' links. The main content area is a light orange rectangle. On the left, a white box titled 'Sign in' contains input fields for 'First Name', 'Last Name', 'Email', and 'Password', and a 'SIGN UP' button. On the right, a light orange box titled 'Welcome Back!' contains the text 'To keep connected with us please login with your personal info' and a 'LOGIN HERE' button.

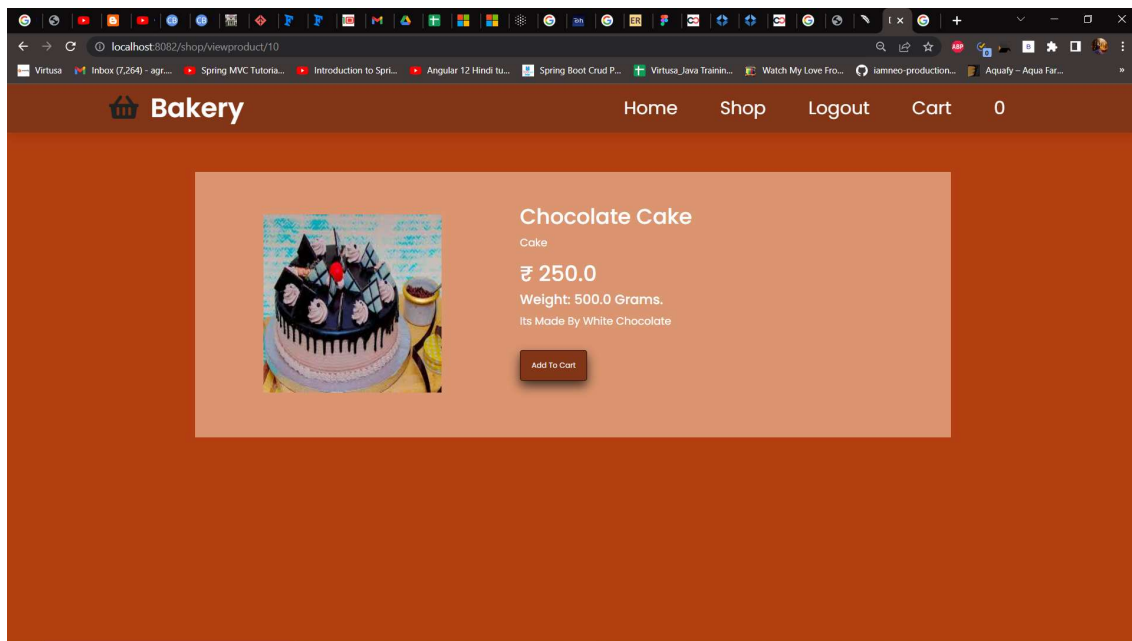

Profile- By selecting the profile button on the navigation bar, customers can view their profiles.

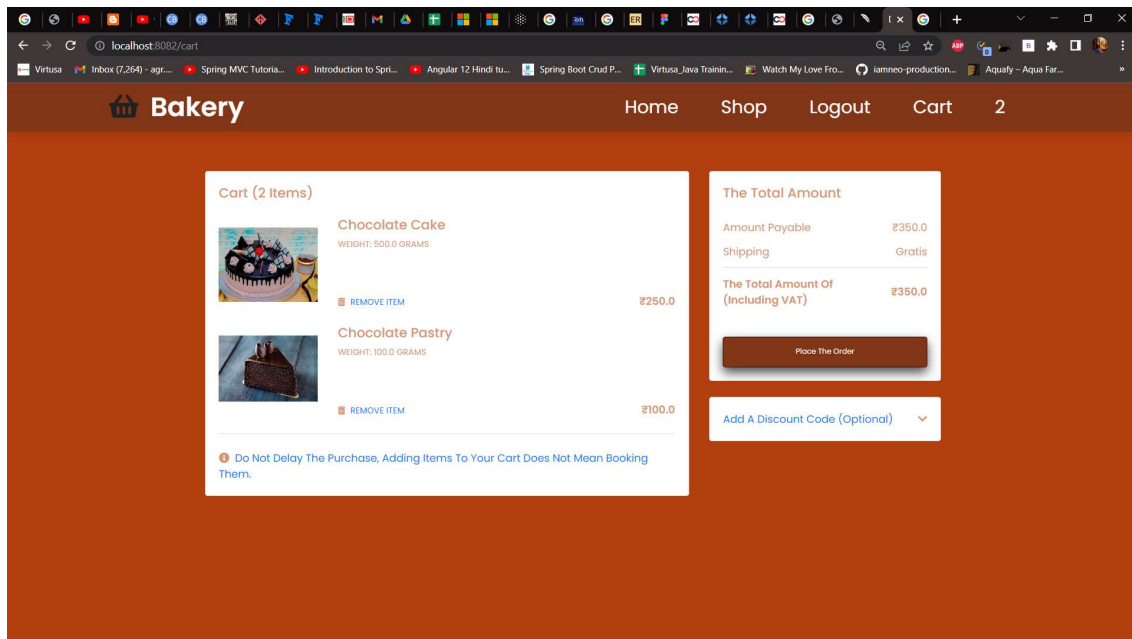

Shop – By selecting the shop button on the front page, customers can view every item in our bakery.

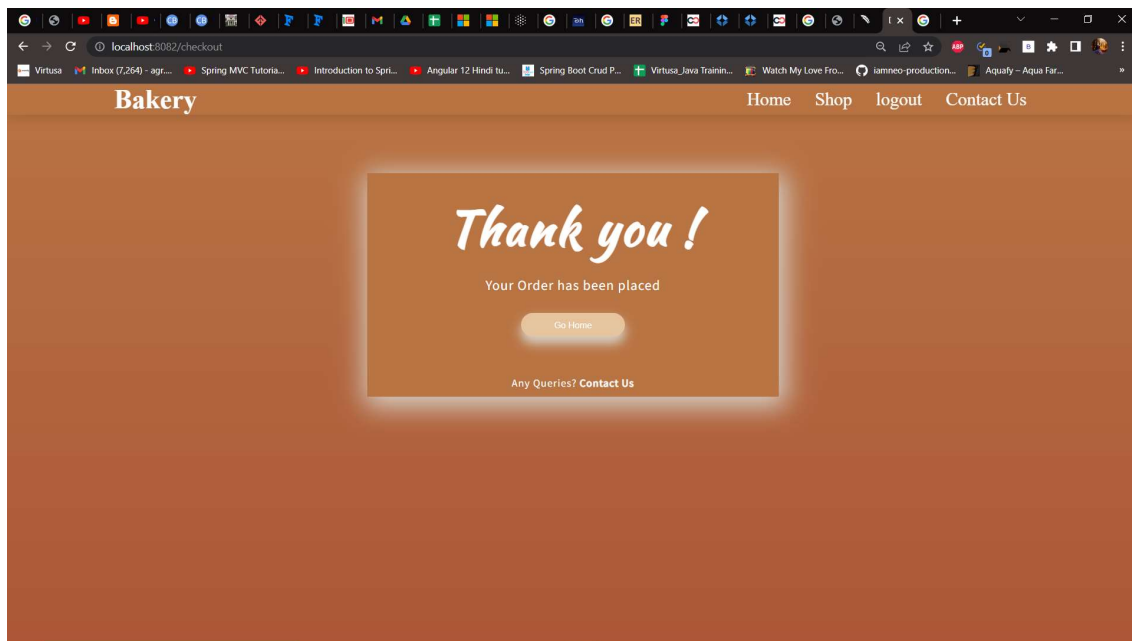

View Product – From here, the consumer can add the item to his cart that they liked.

Cart – You may view every item in your cart from this page and, if you'd like, remove any unwanted products.

Thankyou – After the customer places the order, a thankyou page will be displayed to him.

2. Admin

Admin Credentials

Email – admin@gmail.com

Password – admin
